Camply

Brand colour palette & UI usage guide

Brand personality	Product category
Energetic · Confident · Modern · Performance-focused	Advertising management SaaS

01 · Core brand colours

Use orange as Camply's recognisable action colour, midnight as the grounding interface colour, and peach as a warm supporting surface. Keep the overall interface clean and spacious.

Colour	HEX	Recommended use
Primary Orange	#FF6B35	Primary buttons, active states, key actions
Amber Orange	#FF9F43	Secondary highlights, chart accents, hover details
Midnight	#171923	Sidebar, headings, dark panels, primary text on light surfaces
Soft Peach	#FFF1E8	Subtle cards, selected backgrounds, banners
Growth Teal	#22B8A5	Positive metrics, success trends, healthy performance
White	#FFFFFF	Main content background and clean surfaces

02 · UI colour roles

Element	Recommended colour	Guidance
Primary CTA	#FF6B35	Use for the main action on a page; reserve it for important actions.
Secondary CTA	#171923	Use dark fill or outline treatment when the action is less prominent.
Hover / emphasis	#FF9F43	Use as a supporting highlight; avoid using it for small white text.
Page background	#FFFFFF	Keep the workspace bright and easy to scan.
Card / selected surface	#FFF1E8	Use lightly for grouped content, selected filters or callouts.
Positive performance	#22B8A5	Use for positive trends and success indicators, not as the main brand colour.
Main text	#171923	Use for headings and high-priority content.

Element	Recommended colour	Guidance
Muted text	#626776	Use for labels, descriptions and secondary information.

03 · Suggested dashboard balance

Suggested starting ratio: 60% white / light surfaces · 25% midnight text and structure · 10% orange accents · 5% teal and other status colours. This is a visual guideline, not a strict rule.

Keep large content areas white or very light. Use orange for the primary action and a few key highlights, not for every button or chart. Use teal only where its meaning is positive or successful.

04 · Accessibility & consistency

• Use dark text on orange, amber, peach and white surfaces; use white text on Midnight.

• Do not rely on colour alone for status. Pair success, warning and error colours with labels or icons.

• Check contrast for every text/background pairing before release. In particular, small white text on orange or teal may need a darker shade.

• Keep Scoutly’s blue-and-white identity distinct. Camply should own the orange-and-midnight palette across its logo, dashboard, website and marketing materials.

Palette status: proposed working brand system for Camply. Before public launch, confirm logo use, domain availability and trademark clearance.
